INSTRUCTIONS
FOR THE ADDENDUM TO THE
QUARTERLY REPORT OF CONDITION

I. Fiduciary and Related Assets

Institutions should generally report fiduciary and related assets using their market value as of the report date. While market value quotations are readily available for marketable securities, many financial and physical assets held in fiduciary accounts are not widely traded or easily valued. If the methodology for determining market values is not set or governed by applicable law (including the terms of the prevailing fiduciary agreement), the institution may use any reasonable method to establish values for fiduciary and related assets for purposes of reporting on this schedule. Reasonable methods include appraised values, book values, or reliable estimates. Valuation methods should be consistent from reporting period to reporting period. This “reasonable method” approach to reporting market values applies both to financial assets that are not marketable and to physical assets. Common physical assets held in fiduciary accounts include real estate, equipment, collectibles, and household goods.

If two institutions are named co-fiduciary in the governing instrument, both institutions should report the account. In addition, where one institution contracts with another for fiduciary or related services (i.e. Institution A provides custody services to the trust accounts of Institution B, or Institution A provides investment management services to the trust accounts of Institution B) both institutions should report the accounts in their respective capacities.

Exclude unfunded insurance trust, testamentary executor appointments, and any other arrangements representing potential future fiduciary accounts.

Asset values reported on this schedule should generally exclude liabilities. For example, an employee benefit account with associated loans against account assets should be reported gross of the outstanding loan balances. As another example, an account with a real estate asset and corresponding mortgage loan should be reported gross of the mortgage liability. However, there are two exceptions. First, for purposes of this schedule, overdrafts should be netted against gross fiduciary assets. Second, the fair value of derivative instruments, as defined in ASC Topic 815, Derivatives and Hedging (formerly FASB Statement No. 133, “Accounting for Derivative Instruments and Hedging Activities,” as amended), should be included in (i.e., netted against) gross assets even if the fair value is negative.
Fiduciary and Related Assets (cont.)

Securities borrowing/lending transactions should be reflected as sales or as secured borrowings according to ASC Topic 860, Transfers and Servicing (formerly FASB Statement No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities,” as amended). A transferee (“borrower”) of securities generally is required to provide “collateral” to the transferor (“lender”) of securities. When such transactions do not qualify as sales, securities “lenders” and “borrowers” should account for the transactions as secured borrowings in which cash (or securities that the holder is permitted by contract or custom to sell or repledge) received as “collateral” by the securities “lender” is considered the amount borrowed and the securities “loaned” are considered pledged against the amount borrowed. For purposes of this schedule, securities held in fiduciary accounts that are “loaned” in securities lending transactions (that are accounted for as secured borrowings) should be reported as an asset of the fiduciary account that “loaned” the securities, but the “collateral” received should not also be reported as an asset of this fiduciary account.

In the Fiduciary and Related Assets section, the market value of Collective Investment Fund (CIF) units should be reported along with individual participant accounts in the Column and Item that corresponds to each participant. The aggregate amount of a CIF that is operated by an institution should NOT also be reported as a separate, additional account in the Fiduciary and Related Assets section of this schedule.

Managed Assets
Report the total market value of assets held in managed fiduciary accounts. An account should be categorized as managed if the institution has investment discretion over the assets of the account. Investment discretion is defined as the sole or shared authority (whether or not that authority is exercised) to determine what securities or other assets to purchase or sell on behalf of the fiduciary related account. An institution that delegates its authority over investments and an institution that receives delegated authority over investments are BOTH deemed to have investment discretion.

Therefore, whether an account where investment discretion has been delegated to a registered investment adviser whether affiliated or unaffiliated with the reporting institution, should be reported as a managed account depends on whether the delegation of investment authority to the registered investment adviser was made pursuant to the exercise of investment discretion by the reporting institution. If so, the account is deemed to be a managed account by the reporting institution. Otherwise, the account would be a non-managed account.

An entire account should be reported as either managed or non-managed based on the predominant responsibility of the reporting institution.

Non-Managed Assets
Report the total market value of assets held in non-managed fiduciary accounts. An account should be categorized as non-managed if the institution does not have investment discretion. Those accounts for which the institution provides a menu of investment options but the
INSTRUCTIONS
FOR THE ADDENDUM TO THE
QUARTERLY REPORT OF CONDITION

ultimate selection authority remains with the account holder or an external manager should be
categorized as non-managed. For example, an institution that offers a choice of sweep
vehicles is not necessarily exercising investment discretion. The process of narrowing
investment options from a range of alternatives does not create a managed fiduciary account
for the purposes of this schedule. For example, a 401(k) employee benefit plan where the
participants select investments from a list of investment options should be reported as non-
managed for the purposes of this schedule.

Number of Managed Accounts
Report the total number of managed fiduciary accounts.

Number of Non-Managed Accounts
Report the total number of non-managed fiduciary accounts.

Item No.  Captions and Instructions

Item 2c. **Other employee benefit and retirement-related accounts.** Report the market value and number of accounts for all other employee benefit and retirement-related fiduciary accounts in which the institution serves as trustee or agent. Include Keogh Plan accounts, Individual Retirement Accounts, Health Savings Accounts, Medical Savings Accounts, and other pension or profit-sharing plans for self-employed individuals. Also report the market value of assets and the number of accounts for employee welfare benefit trusts and agencies. Employee welfare benefit plans include plans, funds, or programs that provide medical, surgical, or hospital care benefits; benefits in the event of sickness, accident, disability, death, or unemployment; vacation benefits; apprenticeship or other training program; day care centers; scholarship funds; or prepaid legal services. Employee benefit accounts for which the institution serves as a directed trustee should be reported as non-managed. Exclude accounts, originated by fiduciary or non-fiduciary personnel, that are only permitted to be invested in own-bank deposits. The number of accounts reported should reflect the total number of plans or accounts administered rather than the number of plan participants. Other retirement accounts that are solely custody and safekeeping accounts should be reported in item 8. Individual Retirement Accounts, Health Savings Accounts, and other similar accounts should also be reported in item 10.

Item 3. **Corporate trust and agency accounts.** Report the market value of assets held by the institution for all corporate trust and agency accounts. Report assets that are the responsibility of the institution to manage or administer in accordance with the corporate trust agreement. Include assets relating to unpresented bonds or coupons relating to issues that have been called or matured. Do NOT report the entire market value of the associated securities or the outstanding principal of associated debt issues. Include accounts for which the institution is trustee for corporate securities, tax-exempt and other municipal securities, and other debt securities including unit investment trusts. Also include accounts for which the institution is dividend or interest paying agent, and any other type of corporate trustee or agent appointment. Accounts that are solely custodial or safekeeping should be reported in item 8.

Item 4. **Investment management and investment advisory agency accounts.** Report the market value and number of accounts for all individual and institutional investment management and investment advisory agency accounts that are administered within the fiduciary area of the institution. Investment management accounts are those agency accounts in which the institution has investment discretion; however, title to the assets remain with the client. Include accounts for...

Item No. Captions and Instructions

which the institution serves as a sub-advisor. Investment advisory accounts are those agency accounts for which the institution provides investment advice for a fee, but for which some other person is responsible for investment decisions. Investment management agency accounts should be reported as managed. Investment advisory agency accounts should be reported as non-managed. Investment management and investment advisory agency accounts maintained for foundations and endowments should be reported in item 5. Exclude investment management and investment advisory agency accounts that are administered in SEC-registered investment advisory subsidiaries of the institution. Include those mutual funds that are advised by the fiduciary area that is a separately identifiable department or division (as defined in section 217 of the Gramm-Leach-Bliley Act). Classes of the same mutual fund should be combined and reported as a single account.

5 Foundation and endowment trust and agency accounts. Report the market value and number of accounts for all foundations and endowments (whether established by individuals, families, corporations, or other entities) that file any version of Form 990 with the Internal Revenue Service and for which the institution serves as either trustee or agent. Also include those foundations and endowments that do not file Form 990, 990EZ, or 990PF solely because the organization’s gross receipts or total assets fall below reporting thresholds, but would otherwise be required to file. Foundations and endowments established by churches, which are exempt from filing Form 990, should also be included in this item. Employee benefit accounts maintained for a foundation’s or endowment’s employees should be reported in item 2. Accounts that are solely custodial or safekeeping should be reported in item 8.

6 Other fiduciary accounts. Report the market value and number of accounts for all other trusts and agencies not reported in items 1 through 5. Custody and safekeeping accounts should be reported in item 8.

7 Total fiduciary accounts. Report the sum of items 1 through 6.

8 Custody and safekeeping accounts. Report the market value and the number of accounts for all personal and institutional custody and safekeeping accounts held by the institution. Safekeeping and custody accounts are a type of agency account in which the reporting institution performs one or more specified agency functions but the institution is not a trustee and also is not responsible for managing the asset selection for account assets. These agency services may include holding assets, processing income and redemptions, and other recordkeeping and customer reporting services. For employee benefit custody or safekeeping accounts, the number of accounts reported should reflect the total number of plans administered rather than the number of plan participants. Include accounts in which the

QUARTERLY REPORT OF CONDITION

Item No.  Captions and Instructions

II. Corporate trust and agency accounts:

1 Corporate and municipal trusteedships.  Report the total number of corporate and municipal issues, including equities such as trust preferred securities and asset-backed securities for which the institution serves as trustee.  Also report other debt issues, such as unit investment trusts and private placement leases, for which the institution serves as trustee.  If more than one institution is trustee for an issue, each institution should report the issue.  Securities with different CUSIP numbers should be considered separate issues; however, serial bond issues should be considered as a single issue.  When an institution serves as trustee of a bond issue, it may also perform agency functions for the issue such as registrar (transfer agent) or interest and principal paying agent.  In those cases, report the issue only in “Corporate and municipal trusteedships,” as the trustee appointment is considered the primary function.  Consider the primary function of the appointment when selecting the item in which to report the appointment.  Exclude issues that have been called in their entirety or have matured even if there are unpresented bonds or coupons for which funds are being held.

Report the unpaid principal balance of the outstanding securities for the number of issues reported for which the institution serves as trustee.  For zero-coupon bonds, report the final maturity amount.  For trust preferred securities, report the redemption price.  Exclude assets (i.e., cash, deposits, and investments) that are being held for corporate trust purposes: they should be reported in item 3, above.

1a Issues reported that are in default.  Report the total number and unpaid principal balance (final maturity amount for zero coupon bonds; redemption price for trust preferred securities) of the issues reported in “Corporate and municipal trusteedships,” above, that are in substantive default.  A substantive default occurs when the issuer (a) fails to make a required payment of principal or interest, defaults on a required payment into a sinking fund, files for bankruptcy, or is declared bankrupt or insolvent, and (b) default has been declared by the trustee.  Issues should not be reported as being in substantive default during a cure period, provided the indenture for the issue provides for a cure period.  Private placement leases where the trustee is required to delay or waive the declaration of an event of default, unless requested in writing to make such declaration, should not be reported as being in substantive default, provided such written request has not been made.  Once a trustee’s duties with respect to an issue in substantive default have been completed, the issue should no longer be reported as being in default.

Do not report issues that are in technical default, for instance, if the obligor failed to provide information or documentation to the trustee within specified time periods.
INSTRUCTIONS
FOR THE ADDENDUM TO THE
QUARTERLY REPORT OF CONDITION

Item No.  Captions and Instructions

2  Transfer agent, registrar, paying agent, and other corporate agency. Report the total number of issues for which the institution acts in a corporate agency capacity. Include the total number of equity, debt, and mutual fund issues for which the institution acts as transfer agent or registrar, regardless of whether the transfer agent is registered with its appropriate regulatory agency. Separate classes of a mutual fund should be consolidated and reflected as a single issue. Include the total number of stock or bond issues for which the institution disburses dividend or interest payments. Also include the total number of issues of any other corporate appointments that are performed by the institution through its fiduciary capacity. Issues for which the institution serves in a dual capacity should be reported once. Corporate and municipal trusteeships reported in “Corporate and municipal trusteeships,” above, in which the institution also serves as transfer agent, registrar, paying agent, or other corporate agency capacity should not be included in item 1a. Include only those agency appointments that do not relate to issues reported in “Corporate and municipal trusteeships.”

III. Collective investment funds and common trust funds. Report in the appropriate subitem the number of funds and the market value of the assets held in Collective Investment Funds (CIFs) and Common Trust Funds (CTFs) administered by the reporting institution. CIFs and CTFs are funds that banks are authorized to administer by Section 9.18 of the Office of the Comptroller of the Currency’s regulations or comparable state regulations. If an institution operates a CIF that is used by more than one institution, the entire CIF should be reported in this section only by the institution which operates the CIF. Exclude mutual funds from this section. Each CIF and CTF should be reported in the subitem that best fits the fund type.

1  Domestic equity. Report funds investing primarily in U.S. equities. Include funds seeking growth, income, growth and income; U.S. index funds; and funds concentrating on small, mid, or large cap domestic stocks. Exclude funds specializing in a particular sector (e.g., technology, health care, financial, and real estate), which should be reported in item 7 “Specialty/Other.”

2  International/Global equity. Report funds investing exclusively in equities of issuers located outside the U.S. and those funds representing a combination of U.S. and foreign issuers. Include funds that specialize in a particular country, region, or emerging market.

3  Stock/Bond blend. Report funds investing in a combination of equity and bond investments. Include funds with a fixed allocation along with those having the flexibility to shift assets between stocks, bonds, and cash.

4  Taxable bond. Report funds investing in taxable debt securities. Include funds that specialize in U.S. Treasury and U.S. Government agency debt, investment grade corporate bonds, high-yield debt securities, mortgage-related securities, and
global, international, and emerging market debt funds. Exclude funds that invest in municipal bonds, which should be reported in item 5 “Municipal bonds,” and funds that qualify as short-term investments which should be reported in item 6 “Short-term investments/Money market.”

5 **Municipal bond.** Report funds investing in debt securities issued by states and political subdivisions in the U.S. Such securities may be taxable or tax-exempt. Include funds that invest in municipal debt issues form a single state. Exclude funds that qualify as short-term investments, which should be reported in item 6 “Short-term investments/Money market.”

6 **Short-term investments/Money market.** Report funds subject to the provisions of Section 9.18(b)(4)(ii)(B) of the Office of the Comptroller of the Currency’s regulations or comparable state regulations that invest in short-term money market instruments. Money market instruments may include U.S. Treasury bills, commercial paper, bankers acceptances, and repurchase agreements. Include taxable and nontaxable funds.

7 **Specialty/Other.** Include funds that specialize in equity securities of particular sectors (e.g., technology, health care, financial, and real estate). Also include funds that do not fit into any of the above categories.

8 **Total collective investment funds.** Report the sum of items 1 through 7.
